Medical Diagnosis

The pain level was indicated on a scale of 1-10 as the following: 8

The patient's pain started on or around 2 YEARS

The surgery addressed the following: NA

The pain is experienced **SOMETIMES**

The patient has attempted the following previous treatments/therapies: HEATING PAD , ICE PACKS AND PRESCRIBED PAIN MEDICATION

The patient described their pain as the following: THROBBING

The activities that make the patient's pain worse is as follows: DOING DAILY ACTIVITIES

The pain is located in the patient's Back

The patient's pain is caused by WEAR AND TEAR

The last time the patient has seen the doctor was on 04/03/2024

Chief Complaint

The patient's main complaint is that they experience chronic pain located in the following location(s): Back

Subjective Notes

The patient reports chronic **Back** pain for **2 YEARS**. Patient states pain is **THROBBING** with a pain scale of **8** and pain worsens with movement. The pain is caused by **WEAR AND TEAR** and is experienced **CONSTANTLY**. Previous treatments with heat, ice, and rest have been unsuccessful to control pain level.

Objective of Assessment (Review of Symptoms)

Patient has chronic pain for 2 YEARS located in their Back related to M54.50- Low back pain, unspecified. Patient has been to a physical therapist and hasn't had previous surgery to treat this pain.

Patient's chronic pain is described **THROBBING** and occurs **CONSTANTLY**. The patient rated their pain on a scale of 1-10 (10 being the worst) on a level-8. The following activities make the patient's pain worse: **DOING DAILY ACTIVITIES**. Patient needs a **Back** Brace to provide support and reduce pain level.

Plan & Treatment Goals

Based on my evaluation of the patient's condition, I am ordering the following device(s) L0457 (TLSO, FLEXIBLE, PROVIDES TRUNK SUPPORT, THORACIC REGION, RIGID POSTERIOR PANEL AND SOFT ANTERIOR APRON, EXTENDS FROM THE SACROCOCCYGEAL JUNCTION AND TERMINATES JUST INFERIOR TO THE SCAPULAR SPINE, RESTRICTS GROSS TRUNK MOTION IN THE SAGITTAL PLANE, PRODUCES INTRACAVITARY PRESSURE TO REDUCE LOAD ON THE INTERVERTEBRAL DISKS, INCLUDES STRAPS AND CLOSURES, PREFABRICATED, OFF-THE-SHELF), including fitting and adjustment if needed. The patient has been instructed to wear the device daily, as needed. The benefits of this device, which is an alternative, non-invasive method to potentially relieve pain, has been explained to the patient who is interested in this treatment. Based on my assessment, I have determined it is medically necessary and appropriate to prescribe treatment today. For the patient's complaint, I am prescribing this device. The patient will benefit by helping her address any of the following: give support to weak muscles, improve patient's pain, improve patient's function, increase performance in activities of daily living, improve ambulation, reduce medications, slow degeneration, provide stability, provide support. Reduce pain by restricting the mobility of the trunk; reduce the risk of medical problems escalating the patient's present condition, facilitate healing following an arthritis or surgical procedure to the spine or related soft tissues; To support weak spinal muscles and/or a deformed spine. If the patient's pain persists or worsens and/or there is an acute trauma or arthritis related to this pain, the patient agrees and understands to go to the Emergency Room or follow-up with their Primary Care Physician for further testing and imaging that may be immediately necessary.

ICD 10 (Diagnostic Codes)

M54.50- Low back pain, unspecified

LETTER OF MEDICAL NECESSITY

Re: RICHARD SMITH

Orthotic Device Need Assessment

Exam Date: 04/26/2024

Height: **5'7** Weight: **165** DOB: **05/17/1947**

Mr SMITH is inquiring about utilizing orthotic bracing for his/her current conditions. His/her chief complaint at the time of this assessment is: Back.

Mr SMITH reports chronic Back pain for 2 YEARS. Patient states pain is THROBBING with a pain scale of 8 and pain worsens with DOING DAILY ACTIVITIES. Pain is experienced CONSTANTLY. Previous treatments with heat, ice, medication and rest have been unsuccessful to control pain levels.

Diagnosis includes: M54.50- Low back pain, unspecified. Based on my conversation with Mr SMITH and evaluation of his/her condition, I am ordering the following: L0457 (TLSO, FLEXIBLE, PROVIDES TRUNK SUPPORT, THORACIC REGION, RIGID POSTERIOR PANEL AND SOFT ANTERIOR APRON, EXTENDS FROM THE SACROCOCCYGEAL JUNCTION AND TERMINATES JUST INFERIOR TO THE SCAPULAR SPINE, RESTRICTS GROSS TRUNK MOTION IN THE SAGITTAL PLANE, PRODUCES INTRACAVITARY PRESSURE TO REDUCE LOAD ON THE INTERVERTEBRAL DISKS, INCLUDES STRAPS AND CLOSURES, PREFABRICATED, OFF-THE-SHELF).

Patient is ambulatory and has weakness of the **Back** requiring stabilization for improvement of functionality. I am prescribing this **Back** orthosis for the following indication(s): to aid when the patient is **DOING DAILY ACTIVITIES**, to aid in stabilization of the **Back**. My treatment goal(s) for the use of the prescribed **Back** orthosis are: improvement in patient's function, improvement in patient's pain. The patient has been instructed to use the brace(s) daily, as needed.

Custom fitting of the orthosis is not required and the patient or an assisting caregiver can apply the prescribed orthotic device with minimal self-adjustment. **Mr SMITH** has been provided a phone number to call if there are any additional comments or questions regarding this examination, and I have recommended that **Mr SMITH** continue medical follow-up as part of an ongoing plan of care.

assessment of the patient for the prescribed	his order for the above-named patient, and certify that I have personally performed the d treatment and device and verify that it is reasonably and medically necessary,
according to accepted standards of medica	practice within the community, for this patient's medical condition.
