Mr LAMB is inquiring about utilizing orthotic bracing for his/her current conditions. His/her chief complaint at the time of this assessment is: LOWER BACK, LEFT KNEE, RIGHT KNEE.

Mr LAMB reports chronic LOWER BACK, LEFT KNEE, RIGHT KNEE pain for A YEAR. Patient states pain is SHARP with a pain scale of 6 and pain worsens with STANDING. Pain is experienced SOMETIMES. Previous treatments with heat, ice, medication and rest have been unsuccessful to control pain levels.

Patient is ambulatory and has weakness of the LOWER BACK, LEFT KNEE, RIGHT KNEE requiring stabilization for improvement of functionality. I am prescribing this BACK, KNEE orthosis for the following indication(s): to aid when the patient is STANDING, to aid in stabilization of the BACK, KNEE. My treatment goal(s) for the use of the prescribed BACK, KNEE orthosis are: improvement in patient's function, improvement in patient's pain. The patient has been instructed to use the brace(s) daily, as needed.

Custom fitting of the orthosis is not required and the patient or an assisting caregiver can apply the prescribed orthotic device with minimal self-adjustment. **Mr LAMB** has been provided a phone number to call if there are any additional comments or questions regarding this examination, and I have recommended that **Mr LAMB** continue medical follow-up as part of an ongoing plan of care.
